PROFESSIONAL SUMMARY

Data Analyst with hands-on experience designing and deploying 2 production analytics platforms, building KPI frameworks across 8+ business modules, and performing statistical analysis on transactional datasets spanning finance and retail domains. Proficient in SQL, Python (Pandas, NumPy), Power BI (DAX, Power Query), and full-stack data pipeline architecture — from PostgreSQL through Flask REST APIs to Chart.js visualizations. Skilled in communicating data-driven insights to stakeholders and delivering business intelligence solutions in agile environments.

TECHNICAL SKILLS

Languages & Querying:	SQL, Python, PostgreSQL, SQLite
Data Analysis & Modeling:	Pandas, NumPy, EDA, Data Cleaning, Statistical Analysis, Behavioral Scoring, Star Schema Modeling
Business Intelligence:	Power BI (Power Query, DAX), Tableau, Data Visualization, KPI Dashboard Development
Spreadsheet Analytics:	Excel — Pivot Tables, XLOOKUP, INDEX-MATCH, Data Modeling
Backend & Deployment:	Flask, REST API Development, Gunicorn, Render, PostgreSQL Production, Git, Agile

EXPERIENCE

Data Analyst Trainee — AccioJob

Sep 2025 – Apr 2026

- Executed 15+ multi-table SQL JOIN and aggregation queries on the Northwind database, producing product-level revenue analysis, customer performance rankings, and regional sales trend reports.
- Built 3+ KPI dashboards for multi-region retail sales analysis using Excel Pivot Tables, XLOOKUP, and INDEX-MATCH across Walmart and Global Sales datasets covering 10,000+ records.

PROJECTS

VyapaarIQ — Business Analytics Intelligence System

[Live Demo](#)

Python | Flask | PostgreSQL | SQLite | Chart.js | HTML/CSS | Deployed on Render

- Architected and deployed a full-stack retail BI platform on PostgreSQL production infrastructure with multi-user isolated data architecture, real-time KPI refresh after every transaction, and a 24-month synthetic dataset generator — enabling zero-setup analytics exploration for new users.
- Built an 8-module analytics engine covering sales and revenue trend analysis, profit intelligence (gross margin, net margin, ROI), customer segmentation (top-5 revenue contributors, repeat-customer ratio), inventory intelligence (fast-movers, dead stock signals, reorder-risk thresholds), and MoM expense distribution.
- Engineered a reusable SQL analytics service layer aggregating KPI metrics from transactional tables (psycopg3 / SQLite3) with 4 rolling date-range filters (30/90/180/365 days); designed layered pipeline — Chart.js frontend → Flask REST API → SQL service → PostgreSQL — mirroring enterprise BI architecture.
- Implemented OTP email verification, CSV import with auto-normalization, ZIP data export, and stock-alert monitoring across 100+ SKUs; deployed via Gunicorn WSGI on Render.

FinTrack AI — Personal Finance Analytics Dashboard

[Live Demo](#)

Python | Flask | SQLite | Chart.js | HTML/CSS | Excel Export | Deployed on Render

- Deployed a production-grade personal finance analytics platform with a 5-layer KPI engine: savings-rate calculator, income vs. expense comparison module, 100-point benchmark scoring system, and behavioral profiling engine classifying users into 4 profiles — Saver, Balanced Planner, Growth Builder, Risk Spender.
- Engineered goal feasibility modeling (monthly surplus projection, 0–1 probability score), expense volatility scoring (std deviation normalization), 3 risk indicators (overspending flags, survival-months, emergency fund readiness), Chart.js visualizations (donut + bar), and 4-sheet Excel export.
- Implemented secure user authentication with session management, dynamic transaction categorization, and a monthly financial health report module delivering personalized savings recommendations based on behavioral profile classification.

COVID-19 Global Cases & Vaccination Dashboard

Power BI | Power Query | DAX | Star Schema | Data Modeling

- Designed a star-schema Power BI data model with a centralized Date table; built 5 KPI cards (Total Cases, Recoveries, Deaths, Vaccinations, Fully Vaccinated %) and 6 visualizations including time-series trends, geographic map, bar charts, and progress gauge.

EDUCATION & CERTIFICATIONS

BCA — Kalahandi University | 2022–2025 | 60.31%

Data Analytics (6M) — AccioJob (Apr 2026) | Power BI — GrowAI Edtech (Apr 2026) | SQL Basic & Intermediate — HackerRank (Mar 2026)
